

Please reject NAB's petition 04-160, XM-Radio is a pay service which should not be told how it has to play with the free local radio stations. I pay for a service which has features that I want. The fact that I can choose to listen to traffic and weather reports for all major cities makes travel easier. if I listen to a local station I can not get traffic or weather for say New Jersey. With XM I can. So I can choose another route if Traffic is bad etc. NAB is scared because they see that their old technology can not compete with the newer more advanced service XM and Sirius provides. So they figure they can get you to stop XM and Sirius from competing. Please compition is good. Don't let NAB be like another Microsoft. Let XM and Sirius have it's chance at the possibilities america provides for companies.
